

## *For Hospitals and Healthcare:*

---

# **Aspirin for Your Language Headache!**

When nurses, administrative staff and technicians speak a different language than patients and their families:

- **Patients** may not be able to understand simple questions or directions.
- **Hospital staff** may not be able to give or get important information from caregivers or family members.
- **Employees** may not understand proper protocol and procedures.
- **Support staff** must work harder or second guess what is to be done.

On ***your*** site on ***your*** schedule:

- 📍 **Spanish for Healthcare\***
- 📍 **Accent Reduction**  
(Pronunciation Improvement)
- 📍 **Communicating Across Cultures**
- 📍 **Business Writing**
- 📍 **American Sign Language**
